Cherry Creek Dam Road closed for repairs beginning Oct. 6

Cherry Creek Dam Road between Parker Road and South Dayton Street will be closed for repairs approximately 30 days beginning Oct. 6, 2003.

Arapahoe County is closing Cherry Creek Dam Road to replace the safety guardrail on both sides of the road. While Cherry Creek Dam road has been improved several times since it was built in the late 1950s, the original guardrail has never been replaced and has deteriorated. Because the road is so narrow, the only way to safely replace the guardrail is to close the entire segment of the road during the construction project. The contract allows the contractor to work 24 hours a day, seven days a week.

As an incentive to complete the project early, the County will pay Adarand Constructors, the contractor, \$3,000 a day to a maximum of \$30,000. Cost of the project is \$349,612.50 and is funded by Arapahoe County.
