## Construction on South Quebec Street to begin

**Littleton, Colorado** – The widening of the section of South Quebec St. between East Warren Avenue and East Iowa Avenue is scheduled to begin construction Aug. 14.

The project will add two lanes to South Quebec St. west of the existing lanes, to construct a four lane urban arterial roadway section with a raised median, a new widened bridge over Cherry Creek, storm sewer and water quality improvements, curb/gutter/sidewalk, replacement of the two existing traffic signals in the corridor, and other associated improvements.

Federal dollars, which are administered by the Colorado Department of Transportation, will be used to fund the \$8.2 million project at 70 percent, with the City and County of Denver and Arapahoe County are splitting the 30 percent match expense equally.

Arapahoe County is the contracting agency for the project, in partnership with the City of Denver and oversight from the Colorado Department of Transportation. The construction contract was awarded to SEMA Construction Inc. The construction project is expected to last 12 months, depending on winter weather. The plans are to keep the road open during construction, however typical construction conditions and inconveniences will exist, and alternate routes are advised.

For more information, contact Brian Love, Assistant CIP Program Manager at 720-874-6500.
