

# Preliminary Design of South Gun Club Road

## East Quincy Avenue to South Aurora Parkway

### Points of Interest

## ◆ Partial Continuous Flow Intersection (CFI)

- ◆ The partial CFI has been completed in Baton Rouge, LA, and Salt Lake City, UT. Both appear to be received favorably
- ◆ Offers a moderate cost for construction at \$12 million
- ◆ Offers a moderate Level of Service of C mid term and Level of Service of D long term
- ◆ Right-of-way impacts are moderate
- ◆ The Partial CFI is not disagreeable to any jurisdiction
- ◆ May present some operational problems for the exit traffic from E-470 especially for traffic headed north on Gun Club Road
- ◆ The intersection may be retrofitted to a full CFI in the future
